

Critical Information Summary

NBN Data Plans - Fibre To The Premises (FTTP)

This will take you through critical information regarding the Astron NBN data plans for FTTP.

Information About the Service

The Astron NBN data plans allow access to broadband internet services through connectivity to the National Broadband Network (NBN). For more information about the NBN and about NBN Co which is building and operating the NBN, visit nbnco.com.au.

Service Availability

The Astron NBN data plans are not available in some areas.

NBN Speed

The download and upload speeds detailed for each plan are the NBN port access speeds. The actual speeds will vary depending on factors such as the equipment you use, the NBN profile used by our suppliers, the nature and quality of the connection at your location, network utilisation and the number of customers accessing the network at any time, your hardware and software and the web sites that you visit. Consequently, we cannot guarantee that the port speeds will be available at your premises.

Equipment Required

To access the Astron NBN data plans you will require an NBN ready modem that supports all types of NBN services. This modem will also need to be WiFi enabled if you want to connect wireless devices to the broadband network. You may purchase an NBN ready modem from Astron – pricing details are provided below under the heading "Information About Pricing".

Minimum Term

The Astron NBN data plans have a minimum term of 24 months. Termination fees apply if you cancel the plan during the minimum term – details of the early termination fees are provided below under the heading "Information About Pricing".

Exclusions and Limitations

Astron's NBN service does not support priority assistance, medical alert/emergency call systems or calls to numbers beginning with 19/1900 or 0500 or fax and back to base alarms.

Once you take up a broadband service on the NBN network you can't move back an ADSL service on the copper network (except in fixed wireless areas, where these services will still be available).

Astron may require you to pay your bill by direct debit from your credit card or bank account in order to use our services.

Astron's Reasonable Use Policy

Astron's Reasonable Use Policy applies to all our NBN data plans. Your unlimited monthly data allowance is subject to this Policy. You can find Astron's Reasonable Use Policy at www.astron.net.au/terms-and-conditions.

Installation

You may need certain equipment to be installed at your premises by NBN Co. There may be an additional charge for non-standard installations. We will let you know in advance if an additional charge will apply and only proceed if you agree.

You must obtain permission from the owner of the premises, if that's not you, to have Astron's NBN broadband installed, and have someone over 18 years of age in attendance at the installation appointment. Two appointments may be needed to connect your broadband to the NBN, one with NBN Co and one with our third party network supplier. We'll arrange both appointments as required.

Information About Pricing

	Astron NBN Basic - FTTP	Astron NBN Boost - FTTP
